

A1
cont

for smoothing a supply voltage according to the invention,
wherein a second capacitive element is formed by an
interaction of the second supply track and the third supply
track;

The paragraph starting on page 8, line 21 and ending on
page 8, line 22 now reads as:

A2

Fig. 2a is a circuit diagram for the elements of the
integrated circuit shown in Fig. 1 and Fig. 3;

The paragraph starting on page 8, line 24 and ending on
page 8, line 25 now reads as:

A3

Fig. 2b is a graph showing associated impedance curves of the
integrated circuit; and

Add after page 8, line 25 the following paragraph:

A4

-- Fig. 3 is a diagrammatic, sectional view of a basic
structure of an integrated circuit having capacitive elements
provided for smoothing a supply voltage according to the
invention, wherein a second capacitive element is formed by an
interaction of the first supply track and the third supply
track.--
